The Pentagon Has a Weight Problem.
Let's put it on a diet.

In eight years, the U.S. Pentagon spending has more than doubled to over $700 billion. We've spent nearly $1 trillion on war, wasted $60 billion every year on obsolete Cold War weapons, and maintained over 700 military bases around the world. **Excessive Pentagon spending and continued wars hurt our economy AND international relations, WHILE not making us any safer.** We urge you, our elected leaders, to work with us for Real Security. We oppose the militarization of our foreign policy and support increased investment in diplomacy, humanitarian aid and international cooperation.

JOIN THE CALL TO:

1.) End the war in Afghanistan and the occupation of Iraq. Bring all troops and National Guard home.
2.) Save $60 billion annually by cutting Cold War weapons systems
3.) Reduce the US military footprint on the planet by closing unnecessary US military bases overseas.
4.) Invest in diplomacy with Iran, in Afghanistan, Pakistan, and the Middle East.
