

The Pentagon Has a Weight Problem. Let's put it on a diet.

We Spend 20% of Our Entire Federal Budget on The Pentagon.

Where Can We **CUT** the **FAT**?

Military Occupations of Iraq
and Afghanistan:

\$864 Billion

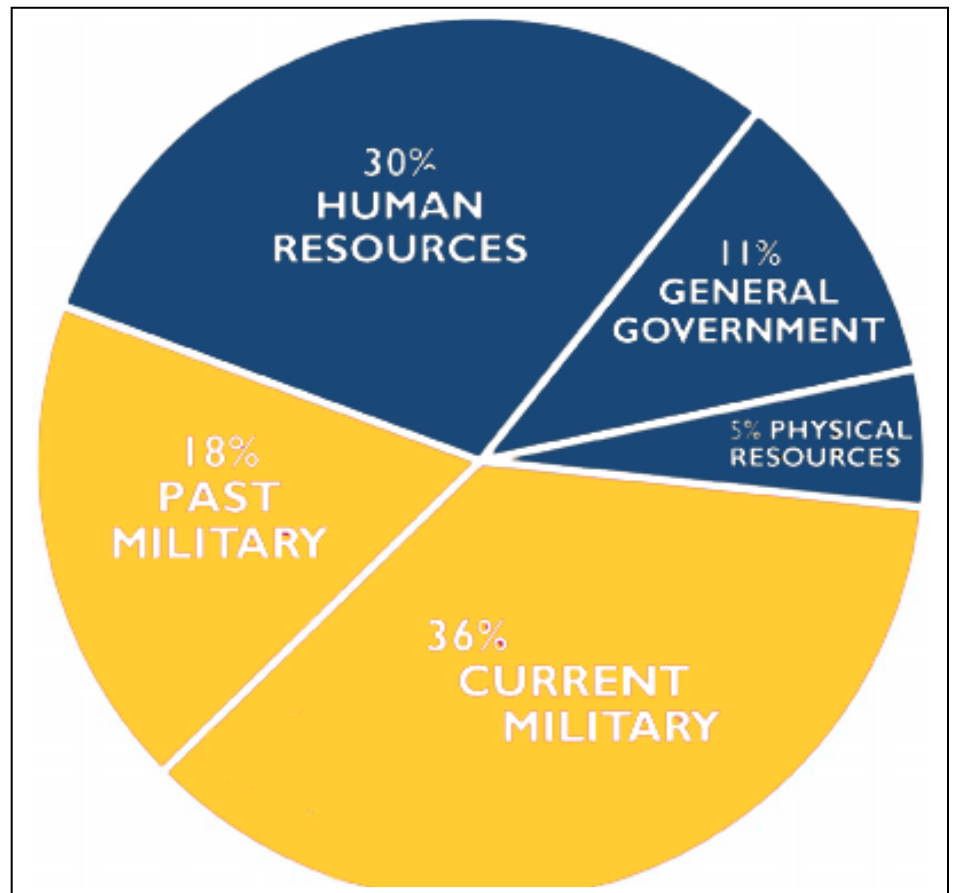

Ineffective Missile Defense:

\$150 Billion

Old Cold War Weapons:

\$60 Billion

TOTAL: Over 1 TRILLION

What Does That Buy Us?

More Deaths: Over 4 thousand U.S. troops have died in Iraq and about 750 have died in Afghanistan.

Less Secure: A recent RAND study claimed military occupation was ineffective at combating terrorism.

Fewer Friends: A poll of 26,000 people in 25 countries showed 68% believe that the U.S. military presence in the Middle East provokes more conflict than it prevents.
